Continuation of Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments: Mr. Dorton had argued that one of ordinary skill in the form panel art would not view the proposed modification set forth in the final Office action as creating a hollow projection extending along either side panel sections. Examiner had stated that such proposed modification creating such hollow projections is tenable and that forming the panel of Meyers as a hollow form panel would create such hollow projections along the respective side panels. Examiner had indicated that Applicant may wish to amend the claim language to more specifically define the "hollow projections", (i.e., insert language fully defining the specific features of the hollow projections versus the side panel), as is shown for example, in Fig. 9 of the instant application. Mr. Dorton has indicated that such amendment may be submitted in response to the final rejection. .
